

You're invited to a "Math IN" !

What: *A "Math IN" is an event that will provide fun and engaging opportunities for families and students to play math games, and to work together on math ideas in a relaxed setting.*

When: *Wednesday, March 13 from 8:30-8:55*

Why: *Math-Ins are designed to highlight the games that are an integral component of our math program. The games that will be played are from the current unit of study. Math-Ins also allow parents to see the math curriculum in action, to explore mathematical ideas with their children, and to see their child's growth as their mathematical thinking changes and develops over time. Because games provide an excellent opportunity for meaningful practice over time, we hope that playing games at school carries over into the home throughout the school year and summer.*

RSVP: *Please let your child's teacher know by **March 8th** if you will be attending so we can work to ensure that every child has a math partner at the Math IN. [You can use this form to RSVP.](#)*

**We ask that younger siblings not attend as we would like parents/caregivers to be able to focus on their student and the playing of the games. Additionally, classrooms can become quite crowded.*
